Notice of Fee Increase on October 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2003. See Revision of Patent Fees for Fiscal Year 2004; Final Rule, 68 Fed. Reg. 41532, 41533, 41534 (July 14, 2003).

The current fee schedule is accessible from (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2003 (or mailed with a certificate of mailing on or after October 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2003, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
- By a small entity (Sec. 1.27(a))..... \$665.00
 - By other than a small entity..... \$1,330.00
- (b) Issue fee for issuing a design patent:
- By a small entity (Sec. 1.27(a))..... \$240.00
 - By other than a small entity..... \$480.00
- (c) Issue fee for issuing a plant patent:
- By a small entity (Sec. 1.27(a))..... \$320.00
 - By other than a small entity..... \$640.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

*Office Action for Allowance -
Applicant's Amendment
(August/27/2003)*

1. Claims 1-22 are allowable over the prior art of record.
2. The following is the examiner's statement for the reasons of allowance:

Claims 1-22 are allowable over the prior art of record because the cited references fails to disclose singly, particularly, or in combination, the subject matter for the emergency dual mode transmitter for simultaneously broadcast emergency equal spaced band of plurality signals, having variable multi-signal generator for selectively adjusting center frequency to cause plurality of signals to cover differing portions of the selected frequency band, having a mixer for receiving output signals of both first and second signal generators, and the providing a corresponding sum of sine wave signals each corresponding to one of the set of carrier frequencies. The closest prior art from Argo-'978 does not teach the above claimed features. Argo-'978 teaches the generating of FM and AM comb frequencies which does not having the tunable center frequency due to the output low pass filters for AM/FM, and Argo's FM/AM signals are generated on different carriers for different antennas, which is different from the claimed features of modulating AM/FM base band signals onto the same carrier. The claimed features are allowable as shown in the independent claims, and the dependent claims are also allowable due to their dependency upon the independent claims.

[claims 1, 13, 17]

a multi-signal generator for simultaneously providing a plurality of signals within a selected frequency band and;
having a center frequency and relative frequency spacing of said simultaneous plurality of signals;
wherein center frequency is selectively adjusted to cause said plurality of signals to cover a corresponding selected portion of the selected frequency band;
a modulator connected to said multi-signal generator for selectively and simultaneously modulating said plurality of signals; and

Art Unit: 2685

a control unit for selectively controlling said multi-signal generator center frequency.

a mixer receiving the output signals of said first and second signal generators, and providing output signal;
providing a corresponding sum of sine wave signals each corresponding to one of the set of carrier frequencies.

Considerations has been made to the following relevant prior arts:

Argo-'978 [Argo discloses the emergency broadcast of signals using separate comb line generators for generating separate AM/FM fixed frequency band signals];

Maxwell-921 [Maxwell teaches the direct digital synthesizer DDS 112 for generating frequencies having selected center frequency];

Katznelson-'100 [Katznelson teaches the variable phase comb generator which provides a periodic waveform containing harmonics of the fundamental frequency];

Scholsser-'194 [Scholsser teaches the calculation of the variance of amplitude and variance of phase using weighting factor];

Hunsinger-'396 [Hunsinger teaches the modulating signal corresponding to the sum of sine wave signals];

The prior arts are not disclosing the claimed features, singly, or in combinations, as shown above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "comments on statement of reasons for allowance".

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Chow whose telephone number is (703)-306-5615.
